EDUCATION

SRM Institute of Science and Technology (KTR)
CSE CORE, Bachelor of Technology (BTech)
GPA: 9.13

Aug 2024 - May 2028

WORK EXPERIENCE

Delegate Affairs Head, SRMMUN

Jul 2025 – Apr 2025

- Served as Delegate Affairs Head for SRMMUN, managing communication and coordination with both internal and external delegates across all sessions.
- Organized and coordinated event logistics, overseeing delegate onboarding, scheduling, and ensuring smooth execution of the conference.
- Collaborated with committee members to manage the event from planning through execution, maintaining clear communication channels throughout.

Corporate Member, CAD 4.0 — Control Alt Delete (National Hackathon)

- Contributed to organizing CAD 4.0, a 24-hour national level hackathon, supporting end-to-end planning and coordination as a corporate member.
- Managed participant registration and judge coordination, ensuring a seamless event experience for all stakeholders.

Leadership in Business Analytics (Distinction), NUS — Prof. Tan Wee Kek

17 Jan - 2025

- Completed an intensive analytics leadership program, developing expertise in data driven strategy, stakeholder alignment, and digital transformation.
- Awarded Distinction for outstanding performance across assessments and project execution in a globally competitive cohort.

PROJECTS

UI/UX Designer, CitySafe - Smart Traffic & Safety Web Platform

6 Apr - 2025

- Advanced to penultimate round in 'TechXcelerate' organized by BITS Pilani (Hyderabad) developing an AI-powered urban safety solution among multiple competing teams.

- Built an AI-based urban safety monitoring system using computer vision to detect hazards such as unsafe zones, anomalies, and potential threats in real time.
- GitHub: <https://github.com/kushagrjoshi777/CitySafe-2026>

FESTIFY — Full-Stack College Festival Event Booking System

- Built a next-generation campus event management platform with offline-first architecture, featuring instant booking confirmations, multi-tier pricing (Early Bird, Regular, VIP), and a glassmorphism UI with responsive design across all devices.
- Developed admin dashboard with real-time analytics, complete event lifecycle management, role-based access control, venue capacity tracking, and revenue monitoring per event tier.

Niyantra AI — Supply Chain & Global Logistics Intelligence Platform

- Designed and deployed a premium data-dense platform providing high-fidelity, real-time risk analysis and interactive visual workflows for tracking international supply chain events.
- Deployed at: <https://niyantra-ai.vercel.app/>

Muscle Map — Fitness & Health Tracking Application

- Co-developed an application to help users track workouts, monitor health metrics, and visualize fitness progress through an intuitive interface.

STEP — Java Programs Implementation and Learning

- A curated repository of Java programs covering core concepts and advanced implementations, built as a structured learning and reference resource. (Java)

ACHIEVEMENTS

- International Space Olympiad 2023 – Secured World Rank 6.
- Leadership in Business Analytics: Empowering Data-Driven Decision Making – National University of Singapore (Jan 2025).
- Participant – Google Cloud Agentic AI Day powered by Hack2Skill.
- Participant – Prayatna 2.0 OIST ACM Student Chapter Submission Round.
- TechXcelerate 2025 Hackathon – Selected for Penultimate Round at BITS Pilani Hyderabad.

TECHNICAL SKILLS

- Programming: C++, Python, C, Java, Embedded Systems
- AI/ML & Computer Vision: OpenCV, MediaPipe, TouchDesigner
